PROFESSIONAL EXPERIENCE

Senior Web Engineer - Front End

Switch Software (UY + USA Client) | Aug 2024 - Present (Full-time)

- Collaborate with a US-based client to develop a large-scale SaaS front-end application in the construction industry.
- Design and implement scalable, maintainable features using Angular 18 within a monorepo architecture, working closely with AI tools.
- Work in an Agile environment, collaborating with cross-functional teams across different time zones.
- Implemented Jest from scratch as the unit testing framework in a multi-application monorepo and created best-practice guidelines for the development team.
- Drove the adoption of front-end best practices, including the implementation of a Signals-based state management system (Signal Store).

Assistant Professor

ORT Argentina Technological Institute of Higher Education
May 2024 – Present (Part-time)

- Assist professors in course development and grading.
- Design and teach engaging courses.
- Mentor students in career paths and real-world IT scenarios.

Semi-Senior Web Developer - Full Stack

Coto CICSA (AR) | Aug 2022 – May 2024 (Full-time)

- Developed comprehensive HR solutions utilizing Angular versions 10 through 14.
- Architected, designed, and developed critical web applications from scratch using Angular 14 and above.
- Maintained and enhanced multiple web APIs using .NET Core 3.5, 5, and 7, integrated with Entity Framework.
- Served as a mentor and trainer for different dev teams.

Junior Web Developer - Full Stack

Ministry of Defence (AR) | Jan 2021 – Aug 2022 (Full-time)

- Architected and led the development of internal evaluation processes and reporting systems.
- Developed applications using Laravel, Vue.js 2, and .NET Core with Entity Framework integration.

Web Developer & Designer - Freelance

Fiverr.com | Jul 2020 – Jan 2021 (Part-time)

- Various web app developments using Vue.js 2.
